Welcome to our 22nd annual terminal sire sale.

We are excited to welcome you back to Edendale Deer in 2026.

2025 was a good year for us at Mt Possession. We had a lot of growth and change within our team and have completed some special projects on farm – including a new deer crush and extension to the deer shed. After a healthy and exciting trophy season, we were delighted with our velvet growth during the spring and summer months.

We pride ourselves on our consistency and constitution of our bulls. These young sires are bred initially for our own use, to provide the 1500+ venison weaners we finish each year. They have wintered for two years in their age group mobs. This year's mob came through on a mixture of swedes, fodder beet and silage, and then were drafted from their main group in mid-December after velvetting.

Once again, we are making available a line of sires from another system. We select our top growth rate stags from our 1500 finishing deer, using the weights from weaning until the start of the chill trade. We sort through these, use the top performers ourselves as spikers and again at two years old and now the best of these are available today in the sale. They have no recorded sire/dam information, but have the constitution, conformation and recorded growth to breed you venison for the chill trade.

In 2025, we are proud to present a selection of our 3-year old and 4-year old wapiti terminal sires, including a small selection of dual-purpose sires. These have all been Paralisa tested Johnes negative on 22/12/2025 and all have a C10 TB status.

After the success of previous on-farm hybrid sales, we are pleased to repeat the process with the support of PGG Wrightson. The sale is again hosted online by bidr, so if you are unable to make it, join us online and bid in real time remotely.

To ensure your new animals arrive safely, we will be organising all transport of sale sires through Downlands Deer.

Thank you for attending our sale, it wouldn't be without the hard work of our great team at Edendale Farming and the continued support from Donald and Leigh.

Should you have any questions or would like to organise a viewing, please do not hesitate to contact one of us.

Kind regards,

Edendale Farming Limited

Maximise your opportunities with a new sire

For new deer farmers, or those who have purchased a sire from us, we offer a few suggestions or general comments that may assist in a successful mating and maximum return on your investment. Good animals are worth looking after!

Relocation – as deer have strong social structures in their groups, there will be a degree of stress in taking young stags from their mobs and comfort zone and transporting them to a new environment. This can be minimised with understanding and common sense. Ideally, if an animal is transported with a familiar stag from his home, he will shift more easily. Sounds like a ploy to increase sales, but multiple animals certainly settle more quickly.

If you shift a single animal, relocate them to a small group of preferably lesser aged males ie. Spikers or two year olds. Failing that, a quiet mob of hinds and fawns is often available for that introductory period. A paddock where the sire can settle under trees or at least far away from major vehicle disturbance is ideal. Our animals run in large groups, quite extensively, so may take a week or two to settle to an urban environment.

Some young elk and Wapiti sires can be intimidated and dominated by smaller but more aggressive older red stags, even in adjoining paddocks, so mating or locating them away from older sires often works best. If you multiple mate your sires, we find it is desirable to match stags of equal age or size so that one doesn't dominate for more than one cycle.

After the rut in early May our policy with removing Wapiti type sires is to run them into the shed and administer a drench whether they look under parasite stress or not. Recent research by the Elk Wapiti Society of New Zealand and Invermay has shown drench resistance in some worms, particularly Ostertagia, to moxidectin chemicals. Injectable products have a greater efficacy, but do not be compliant with your parasite management in deer. Seek your veterinarians advice if you are unsure.

As with other deer species, elk and Wapiti can suffer from low trace element levels that may not affect sheep and cattle, such as copper, cobalt, zinc and selenium. Regular soil or animal testing and remedial supplement is important.

Some bloodlines of deer show greater susceptibility to grass staggers. Prevalence of higher endophyte levels in late summer and autumn prior to the rut can ruin your mating program.

Feed your sires extra in that early winter period before the real cold sets in, as recovered energy and body mass will assist the worn out stag to recover for velvet growth and the next mating.

Edendale Farming Limited

Conditions of sale

1. Sale will be conducted by PGG Wrightson with the conditions of the sale as set down by the Stock and Stations Agents Association, a copy of which is exhibited in the office on sale day.
2. Each lot shall become the property and responsibility of the purchaser at the fall of the hammer.
3. Terms are strictly cash unless prior arrangements have been made with Edendale Farming Limited.
4. Sale will be conducted GST exclusive.
5. Intending purchasers are required to register with the auctioneers prior to the commencement of the sale.
6. A buyers commission of 4% is payable to recognised independent agents introducing and accompanying purchasers to the sale prior to commencement of sale.
7. Edendale Farming Limited will assist with transport of sale stock through Downlands Deer. The purchaser must give delivery instructions to the Edendale Farming team on the day of the sale, using the delivery sheet in the back of this catalogue.

Disclaimer

Purchasers, advisors and all other persons viewing or dealing with the stock must make their own assessment and judgement on the stock and information in this catalogue.

Although every care has been taken in ensuring the accuracy of the information in the catalogue, no responsibility is accepted for any errors that made be included therein.

Health and Safety

This is a working farm and we advise all visitors to the property to follow any signage and/or instructions from staff.

YOU NEED THE BEST. TO LOOK AFTER THE BEST.

When it comes to the transport of stud livestock you can't go past Downlands Deer and Studstock.

During the past 40 years, we have pioneered the way in studstock transportation with purpose built trucks, calm expert livestock handlers, efficient nationwide transport routing and now with visual tracking from pick up to delivery.

Talk to Downlands Deer and Studstock today to ensure your livestock arrives in the best condition possible.

WHEN YOUR ADVICE IS REALLY GOOD, EVERYONE LISTENS.

At FMG, we look after more rural New Zealanders than any other insurer. In fact, it's something we've been doing for 121 years. So when it comes to offering specialist advice, like protecting deer sheds and farm buildings, we like to think we know what we're talking about. Ask around about us. Or call us directly on 0800 366 466.

We're here for the good of the country.

Thank you for attending our 22nd annual Edendale Deer Wapiti Terminal Sire
Sale

This sale will be hosted by bidr® (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr® using an account held with one of the bidr® partner agencies in advance of the sale date.

The bidr® team is available to assist intending purchasers with signing up and registering - please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

Alternatively, contact your local bidr® representative:
