

Pullars <u>Littlebourne</u> Farm Ltd

321 Devereaux Road, Winton 1.00pm, Wednesday 14th January 2026

Look at the dopey names on this menu! What's a Wapiti Burger?

To all Deer Farmers

Greetings and welcome.

Our entry into breeding and selling high producing stud animals is no accident. Four generations of breeding stud sheep and dairy animals preceded our investment in the deer industry 46 years ago.

Our view is that breeding from our sires mated to Red, Hybrid, Fiordland or New Zealand Wapiti is the most efficient and profitable. We have been weighing and culling animals for 40 years and are now involved with **Deer Select**.

Exciting opportunities for buyers looking to take advantage of excellent demand for deer products abound in our offering for those upgrading their herd sires.

Please be reminded: -

- 1 You can expect low birth weight fawns that just keep growing.
- 2 No animals enter our breeding/selling programme have had assisted births.
- 3 All animals have a background of Fiordland Wapiti.
- 4 All sires have been blood tested for Johnes and are **negative**.
- 5 We take pride in that buyers from lifestyles to large farming operations are repeat clients.
- 6 Astute observers will have noted that Littlebourne Sires over 3 years feature in a nationally promoted Deer Select Wapiti.
- 7 Littlebourne Wapiti are not:
 - A Overfed
 - B Over promoted
 - C Over priced
- 8 Since 1987 we have showed quality velvet, our best effort Champion of Champions at the 2019 Elk/Wapiti Competition!
- 9 We value the support of agents, clients and associates over 46 years of deer farming.
- 10 Have a safe, happy and prosperous 2026.

Geoffrey & Sam

SOUTHERN ELITE ELK/WAPITI SIRE SALE

on farm Devereaux Road Winton,

Sale commences 1:00pm Velvet will be on display on Sale day

ANIMAL INSPECTION

Inspection prior to sale by arrangement with Ben Beadle or the vendors. On the day of the sale, bulls may be viewed from 12 noon.

T.B. STATUS

All bulls are from C10 Status (minimum) properties. Accredited for over 30 years.

GRAZING

Grazing is available for a limited period, while purchasers await transport arrangements. Any grazing arrangements must be made with the Agent's office, on sale day. All care and no responsibility. ALL DEER MUST BE INSURED.

INSURANCE

Insurance facilities will be available at the Agent's offices.

GUARANTEE

If a bull proves to be sterile it will be replaced by an animal of similar quality or the purchase price refunded. The guarantee refers specifically to sterility and not to any other condition due to accident or illness. (No claims after 12 months of sale.)

CONDITIONS OF SALE

- 1. The sale will be conducted by PGG Wrightson with the conditions of sale as set down by the New Zealand Livestock and Stations Agents Association, a copy of which is exhibited at the sale venue on the day.
- 2. Deer will be offered as catalogued, subject only to final draft.
- 3. Intending purchasers are required to register at the office prior to commencement of sale to obtain buyer's number and advise appropriate stock and station agents.
- 4. Each lot shall become the property and responsibility of the purchaser on the fall of the hammer.
- 5. Terms will be strictly cash before taking delivery of any animal unless prior arrangements are made with the Auctioneers. Accounts not paid within 14 days of the sale shall bear interest at current rate per annum from the date of purchase.
- 6. A buyer commission of 4% is payable to non participating companies and recognised independent agents introducing and with purchasers, with prior (24hrs) arrangements made with PGG Wrightsons.

- 7. Sale will be conducted G.S.T. exclusive.
- 8. Purchasers must give complete delivery instructions to the office, using one of the delivery instruction sheets in the back of the catalogue, and receive delivery docket before removing the animals.
- 9. The descriptions of deer in the sale are supplied by the individual vendor who alone is responsible for their accuracy.
- 10. Except as otherwise expressly provided in these conditions, no guarantee, representation or warranty of any kind is made or given as to the soundness, condition or other quality of any livestock sold in this sale.

DISCLAIMER

All details and descriptions as to stock referred to in this catalogue have been supplied to PGG Wrightson by the Vendor and have not been independently verified by PGG Wrightson. PGG Wrightson, its employees and agents make no representations or warranties or acknowledgement of any kind whatsoever in relation to any part of this catalogue (including, but not limited to the accuracy or completeness of details and descriptions of stock [and other contents]).

Purchasers, advisors and all other persons viewing or dealing with the stock must make their own assessment and judgement on the stock and the information in this catalogue.

PGG Wrightson, its employees and agents are not responsible or liable in any way whatsoever, whether in contract, tort (including negligence), or otherwise, to any person for any loss or damage whatsoever arising directly or indirectly from any information or representation included in or omitted from this catalogue.

Breeding Goals at Littlebourne

We select for:

- Temperament ease of handling
- Conformation we appraise jaw, feet and body type
- Growth rapid growth to 12 months of age for venison production (Deer Select W12 BV)
- Meat meatier animals at 10-12 months of age for venison production
- Parasite Immunity earlier and higher saliva antibody (CARLA) response to lung and gut parasites.
 Higher levels associated with fewer parasites.
- Velvet a valuable additional product particularly Elk Supreme

BUYING BETTER GENETICS

The sire bulls you choose have the biggest impact on the genetic merit and performance of your herd as they produce more progeny than females. The progeny receive half their genetic merit from the sire so choosing the right genetics for your farm is important.

CHOOSING THE RIGHT BULL FOR YOUR SYSTEM

A breeding value indicates the genetic merit and is in the units you measure it so, Growth, Meat Velvet is in kgs. Conception date is in days and Carla is in units. Breeding values are corrected for non-genetic effects giving the best estimate of likely performance.

Three BVs are presented; weight at 12 months (W12BV), eye muscle area (EMACBV) but that is only one muscle whereas the Meat sub-index below, sums all the meat merit and the parasite resistance breeding value (CARLA BV). More BVs are available on request.

Deer Select 2 has introduced new Indexes. Indexes are a combination of breeding values for a trait e.g growth to weaning and growth to 12 months, multiplied by the value of an extra kg of each to a standard production system- so the units are \$ per calf born. The same is done for Meat – breeding values for extra meat yield multiplied by the value of an extra kg of meat per carcass and again in \$/calf born.

With an index a higher value always indicates higher genetic merit for the trait.

The Wapiti Terminal Index = Wap Term Growth + Wap Term Meat

Overall \$\(/ \calf \) born = Growth \$\(/ \calf \) born + Meat \$\(/ \calf \) born

| Example | WTERM | | WTGrowth | | WTMeat |
|---------|-------|---|----------|---|--------|
| 123/22 | \$70 | = | \$55 | + | \$15 |
| 124/22 | \$65 | | \$55 | + | \$10 |

VELVET

Velvet is presented as actual 2 and 3 year old velvet weights in kg.

PLEASE NOTE

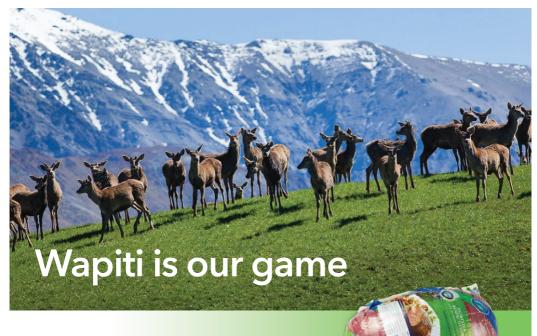

Please note: first calvers are disadvantaged in weight 12 as fawns from first calvers are naturally smaller with milk production of first calvers being less therefore their growth rate will naturally be less. So first calvers on Deer Select – their fawns will have less W12 than MA cows.

Also an outside Bull not on Deer Select starts on O-zero so any sale bull to a sire bull that isn't on Deer Select has a naturally less EBV for all traits. Littlebourne is using 4 to 5 bulls in a mating year – one is generally not on Deer Select so that bulls offspring will naturally be disadvantaged – so please NOTE this.

Please note: the eBV values in our catalogue are only comparable to other Wapiti herds. White 23 sire Y801 isn't on Deer Select so will show lower EBVs

For 30+ years GenomNZ has been conducting parentage analysis for the New Zealand Deer Industry. We offer a SNP based parentage test, containing tens of thousands of markers providing a more accurate parentage assignment.

Pedigree

Profiling

This sequencing method provides precise genomic relationships and breed composition, as well as parentage analysis.

Ear tissue punches are our preferred sampling method (Allflex TSU). This sample type has been shown to provide both higher quality DNA as well as potential on-farm benefits.
