

TIKANA

SOUTHLAND NEW ZEALAND

MONDAY JANUARY 15th 2024, 3.30PM

**ON FARM SALE OF ELK/WAPITI SIRES
YEARLING AND ADULT COWS**

"your genetic key to profit"

TIKANA

SOUTHLAND NEW ZEALAND

Nau mai, haere mai ki Tikana

Welcome to our 2024 on farm sale at Tikana.

The deer industry is currently the most positive in the red meat sector. Within our industry Wapiti are flying high with premiums being paid for Elk/Wapiti velvet and Elk venison. Exciting new markets for Elk meat in North America allows farmers to achieve a schedule premium for more than six months of the year. At last progeny of Elk/Wapiti terminal sires will be able to grow to their potential and farmers be rewarded accordingly.

Venison will always have a niche at the top end of the market and appeal to the discerning consumer. Therefore how we farm our deer and manage the environment are critical factors to maintain that market. We must maintain our position as innovators and leaders.

Make sure you know the direction you want to head with your deer farming operation. Choose a stud breeder who is making genetic improvements in those traits that will help you achieve that direction.

A Genetic Trend Graph shows how a breed is performing over time for any particular trait. In the following pages the green line shows the progress of 23 Wapiti herds and the dotted line shows how Tikana is performing relative to those other Wapiti herds.

We thank past purchasers and welcome you and new buyers to our 2024 offering.

Ngā mihi

Dave Lawrence & Donna Day

www.tikanawapiti.co.nz

GENETICS AT TIKANA

Our breeding objective at Tikana is to make a difference to the New Zealand Deer Industry by producing genetically superior animals for the benefit of other deer farmers.

The Tikana herd has been fully recorded on DEERSelect since 2005 and where appropriate we have been selecting based on eBV's (estimated Breeding Values) generated since 2010. An eBV is the genetic merit of an individual for a given trait once all environmental factors are removed. eBVs put a figure on the genetic worth of an animal for a given trait and indicate the amount that the progeny of that animal will gain or lose for that trait. They are an invaluable tool for selection.

Aside from the obvious conformation and temperament traits we select for:-

GROWTH = Yearling Weight = WT12eBV = How many kg heavier at 12 months old than the 2005 Wapiti average

MEAT = Lean yield = LEANYeBV = the amount of lean muscle per kg of carcass, adjusted for an average 12 month carcass = the extra kg of venison boned off a carcass at a standard weight. It is the best eBV for meat as it uses and balances all available information to indicate above or below average muscling/kg of carcass weight.

MEAT = Carcass Weight = CWeBV = How many more kg of carcass than the average 2005

Wapiti MEAT = Eye Muscle Area = EMACEBV = How much larger eye muscle/backstrap in cm² than the average 2005 Wapiti. Selecting for this trait increases the yield of the higher value carcass cuts. Selecting for this trait increases the dressing out percentage and the meat to bone ratio. Selecting for this trait increases tenderness of venison and eating quality.

INDEX = combination of growth and meat traits economically weighted. It represents how many more \$/hind mated a Wapiti bull will make you.

PARASITE RESISTANCE = the Antibody produced in saliva that occurs in response to parasite challenge = **CARLA10eBV** = progeny of high CARLA sires grow faster, cope better with parasite challenge, reduce pasture contamination by shedding less eggs and larvae.

VELVET = Mature Velvet Weight = **MVWeBV** also beam diameter and style. NB This is within herd only as no Wapiti herds are connected for velvet

top 2%
top 10%
top 25%
top 50%
below 50%

The official published Wapiti Across Herd Sire Summary now means the eBVs for growth, meat and terminal index can be directly compared across Wapiti herds. Using the official December 2023 DEERSelect summary of all 2020 born Wapiti (1323 deer in total) as a reference point, the table below shows where this year's offering of Tikana bulls rank.

The colour code for the percentile bands for traits and Index is based on all Wapiti on DEERSelect born in 2019, 2020 or 2021 as the case maybe

Please note the eBV values in our catalogue are only comparable to other Wapiti herds and not Red Deer herds at the moment.

GENETIC TREND GRAPHS

The solid green line represents the Wapiti average (23 herds). The dotted line is Tikana herd average (Herd number 8314)

TERMINAL INDEX is a combination of growth and meat traits economically weighted. It represents how many more \$/hind mated a Wapiti bull will make you.

MEAT = Eye Muscle Area = EMACeBV

How much larger eye muscle/backstrap in cm² than the average 2005 Wapiti.

Selecting for this trait increases the yield of the higher value carcass cuts.

Selecting for this trait increases the meat to bone ratio

Selecting for this trait increases the dressing out percentage

Selecting for this trait increases tenderness of venison and eating quality

MEAT = Lean Yield = LEANYeBV

The Lean Yield BV is an expression of the amount of lean muscle per kg of carcass, adjusted for an average 12-month carcass.

The **LEANYeBV** balances all available meat information to indicate above or below average muscling/per kg carcass weight.

PARASITE RESISTANCE = progeny of high CARLA sires grow faster, cope better with parasite challenge and shed less eggs and larva onto pasture

WE ALSO SELECT FOR:

GROWTH = Yearling Weight = WT12eBV

How many kg heavier at 12 months old than the 2005 Wapiti average

MEAT = Carcass Weight = CWeBV

How many more kg of carcass than the average 2005 Wapiti

VELVET = Mature Velvet Weight = MVWeBV

Unable to make the sale?

Buy online on bidr® in 3 easy steps:

1

Sign up at **bidr.co.nz** and add your agency account under account details.

2

Browse auctions to find livestock you are interested in buying.

3

Login and register for the real time online auction to bid for the livestock you wish to purchase.

Our partner agencies:

Why use bidr®?

- Free to sign up
- Nationwide reach
- Bid from anywhere
- View auctions and sales results
- Pay for your purchases through your livestock agency account

Standardisation of Catalogue information

A consensus has been agreed to between Wapiti breeders regarding parameters for performance data entered in our sale catalogues. We have all agreed to use standardised weighing times. Growth rates will be based on actual birth dates (or derived from foetal aging), estimated birth weights of 17kg for male calves and 15.5kg for female calves and their 12mth/December weight.

Animal Inspection

Inspection prior to sale by arrangement with Ben Beadle, or Dave Lawrence. On the day of sale, stock may be viewed from 2.00pm.

Velvet

Velvet from sale bulls will be on display on sale day and remains the property of the vendor. Please use gloves provided if you wish to handle the velvet.

Tb Status

Tikana has a C10 status. Last whole herd test was completed on 8/8/2019 and no longer whole herd test as we are in a Surveillance Disease Control Area.

Grazing

Grazing is available for a limited period, while purchasers await transport arrangements. Any grazing arrangements must be made with PGG Wrightsons office on sale day. All care and no responsibility. All deer must be insured.

Insurance

Transit and Livestock Insurance is recommended. Insurance agents will be present on the day to meet your requirements.

Guarantee

If a bull proves to be sterile, it will be replaced by an animal of similar quality or the purchase price refunded. The guarantee refers specifically to sterility and not to any other condition due to accident or illness. No claims after 12 months of sale.

CONDITIONS OF SALE

1. The sale will be conducted by PGG Wrightson with the conditions of sale as set down by the New Zealand Stock and Stations Agents Association, a copy of which is exhibited in the office on sale day.
2. Each lot becomes the purchaser's property and risk at the fall of the hammer.
3. Warranties and Insurance are covered under separate headings.
4. Terms are strictly cash unless prior arrangements are made with the auctioneers. Accounts not paid within 14 days of sale shall bear interest, at current rate per annum from the date of sale.
5. The sale is conducted exclusive of GST.
6. A buyers commission of 4% is payable to non-participating companies and recognised independent agents introducing and accompanying purchasers to the sale providing prior arrangements (No later than 24hrs prior to sale) are made with PGG Wrightson.
7. Intending purchasers are required to register with the auctioneers prior to the commencement of the sale.
8. Except as otherwise expressly provided in these conditions, no guarantee, representation or warranty of any kind is made or given as to the soundness, condition or other quality of any livestock sold in this sale.

gBreed

Genomic Opportunities for NZ Deer

For 25+ years GenomNZ has been conducting parentage analysis for the NZ Deer Industry. We offer a SNP based parentage test, containing tens of thousands of markers providing a more accurate parentage assignment.

This sequencing method provides precise genomic relationships and breed composition, as well as parentage analysis.

Ear tissue punches are our preferred sampling method (Allflex TSU). This sample type has been shown to provide both higher quality DNA as well as potential on-farm benefits.

Hinds and Stags

Profiling, breed composition
\$27.50 per sample
All prices excluding GST

Calves

Full pedigree, breed composition
starting at \$25.85 per sample

**Genetic
Gains Ltd**

DEER Select Bureau

Advice, systems and technologies to
improve deer herd performance

- The recording process is made as easy as possible for you
- Easy to use paper or electronic templates if required
- Reports relevant to the data received are returned to you after each set of data is analysed.
- Updated reports in your chosen format are available on request at any time.
- Reports tailor made for you and your breeding objectives
- Technical advice

Terms for Lots 23 to 26

- Wapiti cows will be mated to high quality Tikana Bulls
- Cows will be pregnancy scanned in May
- Purchaser will be liable for 25% of auction day bid at fall of hammer
- Balance due following notification of positive scan result
- Possession taken in June
- The 25% deposit will be refunded if Negative pregnancy scan

How good are these MA Wapiti Cows?

The Genetic Trend graphs (some are displayed in the front of the catalogue) show where the average Wapiti herd sits for any given trait or index

- **Growth** (WT12eBV) the average of these four Tikana cows is + 17.6kg which is **60% higher** than that of all other Wapiti herds
- **Meat** (EMAceBV) the average of these four Tikana cows is 2.0cm² which is **3 times** more than that of all other Wapiti herds
- **Terminal Index** (TI) the average of these four Tikana cows is **\$27.88** which is **60% higher** than that of all other Wapiti herds
- **Velvet** (MVWeBV) is within herd only.

534/15 - has had two sons whose 2yr velvet cuts were 5.3kg & 6.6kg

717/17 – she is a full sister to Crikey – she ranks in the top 10% or better for all traits.

960/16 - Cow with huge trophy potential. No sons but sire Yukon cut 12.7kg EWSupreme @ 4yrs and 595 NT IOA @ 8yrs. Maternal grandsire Storm is awaiting official confirmation of a 525 trophiescore. Please note the BV values for 960/19 sired by Yukon are most likely understated. Although Yukon (bred by Whyte Farming at Edendale Station) is a grandson of the North American champion bull Korean Gold, he is not registered on DEERSelect and so by default he is allocated a zero value.

968/19 - No sons to date. Exceptional venison traits (eye muscle & lean yield)
